The Leader in Healthcare Comparative Analytics

It's time for healthcare providers, health systems and RCM companies to see what payers, Medicare and regulators already see. They know how everyone compares already. With declining reimbursements, the ever-changing landscape of reform and increasing regulations, everyone needs clarity now more than ever to be successful.

RemitDATA's TITAN solution has revolutionized the healthcare industry by bringing an unprecedented level of transparency into the RCM process. Industry experts and TITAN users agree, this solution has completely transformed the way physicians, health systems and RCM companies manage their business, finally providing them with the insight needed to thrive in today's challenging environment.

Our patented comparative analysis platform presents your business with actionable insights into:

Reimbursement

Accelerate your cash by having fewer exceptions

Utilization

Reduce risk by comparing code usage and performance

Compliance

Set customized audit risk alerts and outlier recognition

Benchmarking

Compare real-time reimbursements against state and national peers

Productivity

Monitor and correct staff productivity and payer performance

Are payers treating me differently from my peers?

How does my denial rate compare to others?

Am I an outlier on key audit triggers?

RemitDATA.com

With the industry's largest provider-focused ERA / ERN and EOB database, TITAN provides the next generation of actionable reimbursement, compliance and productivity insights.

CONFIDENTIAL

Next Generation ERA Database

We leverage industry-leading technologies to create the most powerful and interactive ERA/ERN and EOB database in the industry. Our highly scalable SaaS platform enables rapid access and analysis of huge datasets in seconds for immediate benchmarking performance, as well as utilization and compliance analysis. Each practice can customize the system per user level, so answers to questions are simple, painless and intuitive.

Insight + Action = Results

Through our customized and proactive Insight updates, TITAN delivers vital information on-demand via e-mail or Web portal allowing immediate action to be driven by the appropriate team. Custom Insights can be set for the following:

- Aged cash
- Total processing time
- Audit risks
- Staff productivity
- Unexpected denial rates
- Custom measurements and groupings
- Payer processing time
- Duplicate denial rates

Our Partners

RemitDATA has partnered with the largest Healthcare IT companies, clearinghouses and PM/EMR/EHR companies in the industry to bring TITAN to market.

How is my staff performing?

Am I being paid at the same speed as my peers?

How does my code usage compare to state averages?
